The Lapp Group is a leading supplier of integrated solutions and branded products in the field of cable and connection technology with over 40 sales companies and 18 production sites across the globe.

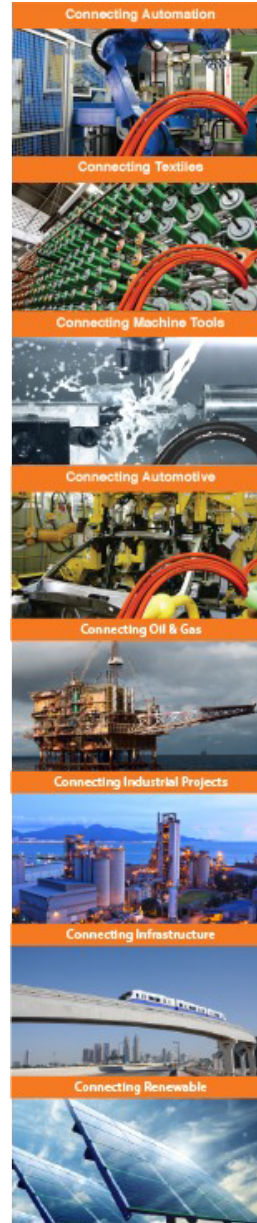

We set up our operations in India almost 20 years ago. Today, Lapp India has the second largest manufacturing facilities of the Lapp Group. In our **Bangalore and Bhopal** plants we produce over 120,000 kms of control, power and communication cables per year. Through our **23 sales offices** and strong network of **140+ dealers**, we ensure our products and services are available wherever our customers are. We have a **network of warehouses** across the country to ensure timely delivery of our products and a **full-fledged Technology and Innovation Center** with a state of the art laboratory to offer leading solution for every business needs from tried and tested standard products to sophisticated customised solutions.

Being a family owned company we value long term relationship with suppliers and customers based on trust and respect. The ability to understand our customer needs and in turn, provide **reliable, durable, safe and high quality** products to foster innovation in our customers' products and solutions sets us apart from the competition.

Our mission is to contribute to the **sustainable growth** of industrial machinery, plant engineering and infrastructure sectors in India by becoming your **preferred partner** for cables, connectors, accessories and End2End systems. Through this monthly newsletter, I would like to stay connected with Lapp India on our latest news and developments. Finally thank you for supporting us and making us who we are.

Marc Jarrault
Managing Director
