Installation Tips

Blank Module   Standard Module

Blank Module

Standard Module

Blank modules are **NOT** intended to be opened after closing

Be sure a cable is always inside the standard module when closing the 2 halves

LAPP GROUP

Installation Tips

To close, simply snap 2 module pieces together around the cable

To open, **press the 2 tabs** on **the top and bottom** at the same time with both thumbs and index fingers

Right index finger

Left index finger

Right thumb

Left thumb
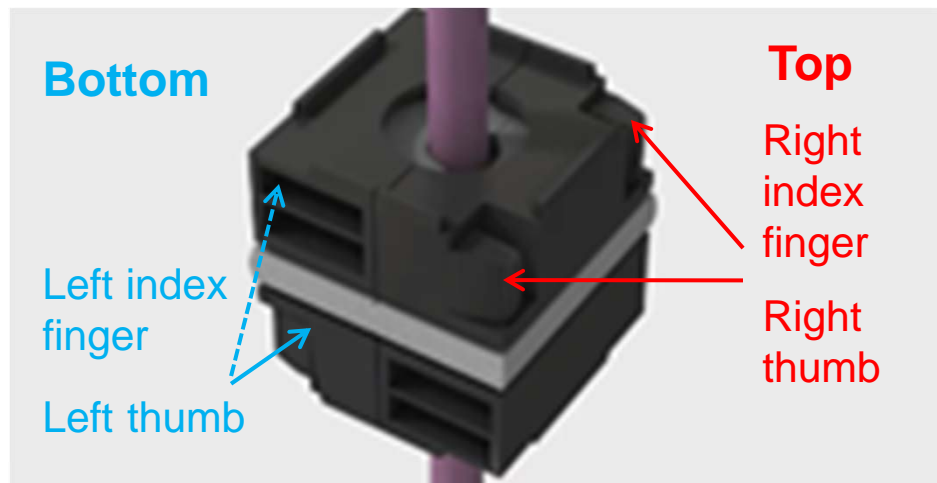

(Make sure the module is fully closed with no gaps – you will hear a click)

LAPP GROUP

Installation Tips
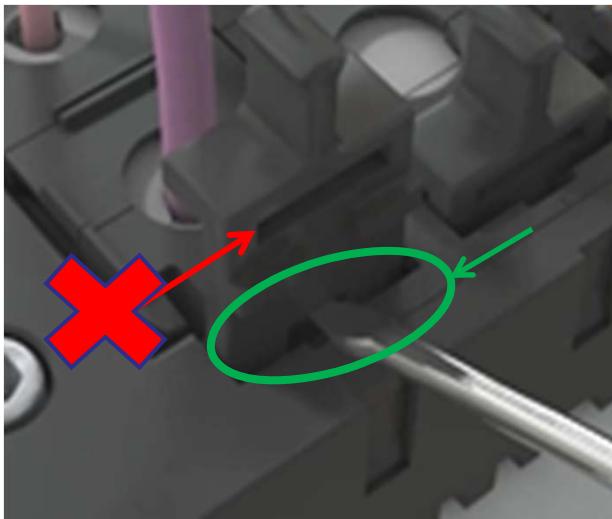

- Move the side clips up and to the side when inserting the modules

- Using the pressure of your thumbs, push the modules flat within the frame

- Once the modules are inside, push the side clips down

Side clips

Repair Tips

To remove a module, insert the screwdriver **below** the large clip slot

Do **NOT** insert the screwdriver into the large top slot. This can cause the side clip to come out

- Using your thumbs, push the module out from underneath

LAPP GROUP

Repair Tips

To fix clips that are accidentally pulled out:

- Unscrew the panel from the frame

- Insert the screwdriver into the bottom side of the frame
  - Lift to remove the top frame layer

- Insert the clip back in the frame and reattach the top frame layer
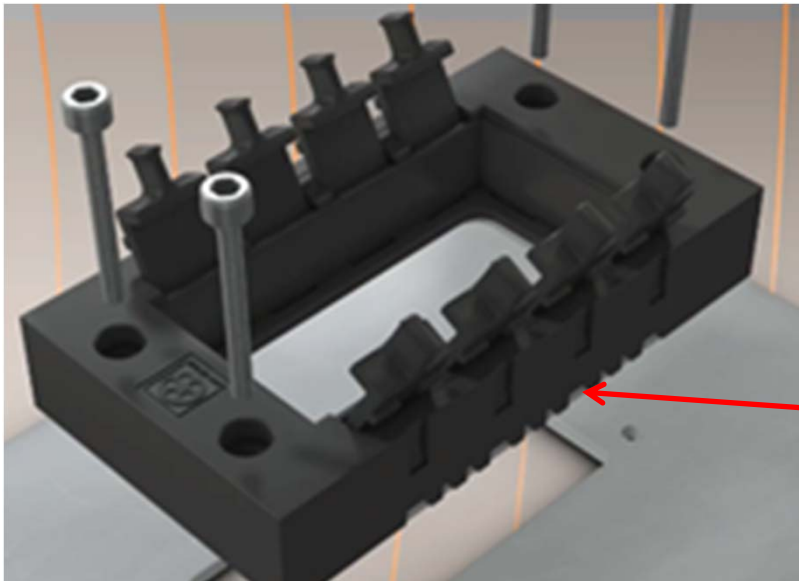

To reinsert clips, insert screwdriver here and lift
