## Lapp position on responsible sourcing in relation to Conflict Minerals

Dear madam or sir,

Lapp does not directly source conflict minerals for the production of Lapp products.

Lapp has committed not to purchase raw materials, subassemblies, or supplies which we know contain conflict minerals.

Currently we can state that only in a few LAPP products raw materials are used where the supply chain has to be clarified.

Regarding the product families, you did buy from the LAPP GROUP:

1119125      ÖLFLEX CLASSIC 110 25G0,75

we herewith confirm, that we have checked the corresponding supply chain:

To the best of our knowledge these products do **not** contain “Conflict Minerals”, as the Dodd Frank Act. Section 1502 imposes.

Sincerely yours,

i. V. Mersid Rizvo  
Head of Supplier Management
