

NOTICE 15.2.2023

Notice about Dual-Use regulation

Dear partner,

We have received requests from our customers to provide a certificate for our products stating that the product is not subject to the restriction of the EU Dual-Use Regulation (2021/821), i.e., a Non-Dual-Use certificate.

According to Finnish Customs' instructions, this Non-Dual-Use certificate is not defined in any EU directive or regulation, so we are no longer allowed to produce such a document.

The EU Dual-Use Regulation only applies to export trade from Finland to foreign countries. Components supplied by Lapp Automation Oy to the domestic market are not export trade, so this regulation has no restrictive effect on our business.

We also have no way of knowing where the component we supply will end up in the final product/end country, and therefore it is the responsibility of the exporting company to clarify the restrictions of the EU Dual-Use Regulation 2021/821 in the context of export clearance. Export means the export procedure referred to in Article 269 of the EU Customs Code.

Regards,

A handwritten signature in blue ink, appearing to be 'Mikael Saarnisto'.
