Valid from: 30.06.2025	Panel strip Vinyl	

Panel strip vinyl for quick and cost-efficient marking in cabinets and other areas.
 Vinyl version helps you create colour markings for all type of installations.
 Easy print out with thermal transfer printer and FLEXIMARK® Software.
 The durable permanent vinyl material is suitable for both indoor and outdoor use.

Technical data

Material:	Vinyl
Adhesive:	Acrylic adhesive
Dimensions:	Core 38 mm
Operating temperature:	40°C to +80°C
Applying temperature:	min +2°C
Recommended storage:	21°C and 50% RH, <two years
Colour:	white, yellow, black, brown, red, orange, green, blue, silver and transparent.

Mounting:

For maximum adhesive, leave label in place for at least 24h.

Other product data:

ETIM Classification: EC001288
 According to SP 2171 Test Method, diesel- and chemical-resistant. For more information regarding resistances, please contact Fleximark AB.

Advantages:

Easy, durable and cost-efficient marking system.
 Marking components on site.
 Easy mounting.
 Easy printout with FLEXIMARK Software and thermal transfer printer.
 Excellent resistance to moisture, alcohols and oil.
 UV resistant material.

FLEXIMARK Panel strip is printed with CAB thermal transfer printers (available in our assortment).
To make the printing process more efficient, the usage of FLEXIMARK® Software, label software for printing marking systems, is recommended (included when purchasing printer from Fleximark AB).
It is important to choose the right ribbon for the right marking.

Accessories CAB SQUIX:

Continuous materials such as FLEXIMARK Panel strip are perforated before they are manually separated.

Accessories CAB EOS:

External unwinder

When inserted, the material rolls are automatically centered.
The unwinder cannot be installed with EOS mobile.

Technical data	For EOS2, EOS5
Roll diameter up to mm	390
Core diameter from mm	38
Winding	Outside or inside
Roll weight up to kg	4

Cutter and perforation cutter

Continuous materials such as FLEXIMARK Panel strip or shrink tubes are perforated before they are manually separated. In addition, the materials can also be cut. The cutter can be pivoted to exchange the material.

Technical data	For EOS2, EOS5
Perforating web distance mm	2,5
Web width mm	0,8
Material width mm	45
Weight cardboard gr/m²	60-240
Thickness mm	0,05-1,1
Cutting length from mm	10
Gap height up to mm	2,5
Cuts/min up to	200
Label winding	Preferably outside
Monitoring	Cutter pivoted, final cutter position has not been reached
