LAPP
Our vision.

You can’t measure customer proximity in kilometres or miles. As a family company, founded and headquartered in Stuttgart, Germany, LAPP offers much more than a fast solution to your electrical challenges: you can be assured of personal attention from trustworthy, cooperative colleagues. The result? On-target and reliable connectivity solutions precisely tailored to your needs.
Five individuals.
Three generations.
One family.
How we’ve developed since 1957

1957
- Founding of the world’s first industrially produced power and control cable: ÖLFLEX®

1959
- Founding of U.I. Lapp KG, Stuttgart, Germany

1963
- Expansion to America: founding of Lapp USA

1976
- Expansion of Stuttgart site with the cable-manufacturing plants and Contact

1978
- Founding of additional sites in Central Europe and Scandinavia

1983
- Founding of Lapp India

1990
- SKINTOP® cable glands are patented

1995
- Founding of Lapp Holding Asia and Lapp Logistics

1996
- Expansion to the East: new sites in the Ukraine and Russia

2004
- Expansion of Industry 4.0 and expansion of automation engineering

2010
- Numerous new developments, such as EPIC® ULTRA and SKINTOP® CUBE MULTI

2011
- First steps onto African continent

2012
- Expansion of the systems business

2014
- Founding of additional sites in Central America, expansion to Northern and Western Africa

2015
- Founding of additional site in Central America, expansion to Northern and Western Africa

2017
- How we've developed since 1957
Who we are.

Closer is better. We aim for proximity to markets and customers.

**proximity**

We stay up-to-date with trends and requirements, and use our skills for trailblazing innovations.

**innovation**

LAPP – it works: LAPP traditionally stands for reliability, quality, durability and sustainability.

**curiosity**

We keep our eyes open, build bridges between the proven and the new, and impress with our technological edge.

**trust**

The highest level of system expertise: 40,000 standard products form the basis for an infinite number of solutions.

**performance**
Innovative technology.
For the world of tomorrow.

Patented mandrel gripper in the logistics centre LC6
Thinking and acting with the future in mind: this is a fundamental part of LAPP’s DNA. Being successful in the long terms means building on past success. The world is moving ever faster, and the demands of the global markets are constantly changing. We are always looking out for our customers. Our finely-tuned sense of trends and markets allows us to develop products today that will be used all over the world tomorrow. While doing so, we place immense value on protecting the environment and on sustainability.

**ENERGIES OF THE FUTURE**

**LAPP focuses on sustainability**

There’s an increasing demand for energy all over the world. Whether we’re sitting at our computer, charging our phones, listening to music, drying our hair or cranking up the heating – we need power and heat virtually around the clock. Much of this need is met by the combustion of fossil fuels such as coal, crude oil and natural gas. Focus is increasingly turning to alternative energies that won’t contribute to climate change and will meet demand without jeopardizing the environment or the energy supply for future generations. LAPP has been focusing on this challenge for many years now, developing connectivity concepts and demand-based solutions in wind energy, photovoltaics and mobility – from detached family homes right up to large-scale plants. Our tradition also incorporates identifying the potential of new markets and tapping this potential through sustainable energy, in Germany and the rest of the world.

**TREND/HIGHLY DYNAMIC APPLICATIONS**

**New in the range: Lightning fast cables for track applications**

Four requirements: Low weight, high acceleration, compact dimensions and a long service life. With LAPP’s premium cables for servo and cable track applications, the right choice for your need is in our reach.

Not only do our innovative cables for cable tracks offer favorable speed and efficiency, they enable productivity improvements through faster position changes for cable track systems.
On December 7, 1835, the legendary “Adler” was the first steam locomotive to trundle along German soil as it made its way from Nuremberg to Fuerth. It was truly a revolution within the field of transportation. Today’s desire for maximum efficiency and minimal dependence on fossil energy sources are bringing about a renaissance in railway travel. This has given rise to completely new concepts in transportation. LAPP has its finger on the pulse of innovation with solutions such as electron beam cross-linked cables and perfectly coordinated connectors.

LAPP supports many industries with short development cycles, intelligent networking and solutions from a single supplier. Industrial machinery, plant engineering and automation technology are applications running successfully with LAPP solutions for years. Our connectivity solutions don’t shy away from the steam and high pressure found in the food & beverage industry either. The same can be said for the adverse effects of heat, cold, moisture and torsion that wind turbines and photovoltaic systems have to withstand. Power and control applications have been our strength from the very beginning. LAPP’s innovative solutions extend to the transportation industry too - from charging systems for electric vehicles to electron beam cross-linked cables for the railway.
Modern technologies for a modern world.
Keeping on top of cost and energy efficiency.
Our modern world has a great need for modern connectivity technologies. Over 600 LAPP experts worldwide are working on more and more new solutions for more and more challenges. Our R&D engineers team up with knowledgeable sales and marketing professionals to develop the best and most sustainable concepts. On-going innovation is driven by the desire for continuous improvement, together with curiosity about different ways of thinking. All while meeting goals for cost and energy efficiency. This is the expectation of our global customers.
What links the new opera house in Beijing with the Øresund bridge in Scandinavia? What do the Pyramids of Giza have in common with soft drink bottling plants? What does the Rolling Stones stage technology share with the world’s largest wind power plants? It’s quite simple: they are all connected using LAPP products.

To develop the best products, you must be curious, demonstrate a pioneering spirit and be able to think big. You must also take the time to put this curiosity into action. We have taken over 50 years to get to where we are today, with over 40,000 standard products. In that time, we have followed industry trends and reacted quickly in the face of changing requirements. Reacting with individual solutions and maximum development expertise within cable and connection technology.

These days, we can offer the right solution to meet all our customers’ requirements. From a standard product to a customized production; from the smallest cable gland to the largest data stream – we can do it all. Anywhere in the world.

Our products make connections – even to the world of tomorrow

The universal range of SILVYN® protection and guidance systems protect cables effectively against dust, moisture, mechanical, thermal and chemical influences. The versatile SILVYN® CHAIN range of energy supply chains also protects and guides cables in dynamic applications.

The requirement: permanent marking. The solution: FLEXIMARK®. These sophisticated systems mean that a clear overview inside a control cabinet is no longer just a pipe dream. From simple labels for manual marking through to electronic markings, the FLEXIMARK® range is guaranteed to be permanent.

EPIC® industrial connectors can be found everywhere in industrial machinery and plant engineering, for measuring, control and drives. EPIC® is a flexible system of housings, inserts and contacts: all extremely robust, absolutely safe and simplicity itself to assemble.

Simply feed in the cable and twist. That’s it. Our SKINTOP® cable glands provide secure connections in no time. The universal systems are simple but effective. They secure and centre the cable, hermetically seal it and guarantee optimum strain relief.

The universal range of SILVYN® protection and guidance systems protect cables effectively against dust, moisture, mechanical, thermal and chemical influences. The versatile SILVYN® CHAIN range of energy supply chains also protects and guides cables in dynamic applications.

The requirement: permanent marking. The solution: FLEXIMARK®. These sophisticated systems mean that a clear overview inside a control cabinet is no longer just a pipe dream. From simple labels for manual marking through to electronic markings, the FLEXIMARK® range is guaranteed to be permanent.
Service is measured in terms of seconds.
Customer relationships in terms of decades.
LAPP is a specialist in integrated solutions for connectivity technology and is also a world-leading system provider for cables and accessories. Whether you want reduced storage costs, reliable machine times, lower maintenance costs or simply need to be able to reduce risks, LAPP system solutions are always a safe bet. Rather than tell you, we show you our many long-standing business relationships with satisfied customers and partners all over the world.

**LOGISTICS**

**On time delivery**

Who actually likes waiting for a product, service or solution? We won’t leave you waiting, as we guarantee a quick delivery. All over the world. We also have a close-knit network of logistics centres and professionally trained consulting experts. With hi-tech logistics, we guarantee a smooth delivery service.

**SERVICE**

**Time for you**

Our customers are important to us. That’s why we make lots of time for them. Time to fully understand their wants and needs; time to offer the right solution. We are absolutely convinced that this is the only way to forge a long-term partnership beneficial to both sides.

**SUSTAINABILITY**

**Always a good thing**

Technological advancement and ecological sustainability will never be overlooked. That’s why we are environmentally conscious regarding natural resources.
ÖLFLEX® CONNECT
Systems Solutions made by LAPP

With our systems service ÖLFLEX® CONNECT, we offer customized cabling solutions assembled exactly to your requirements.

Everything is possible - from cable assemblies to industry standard servo connections right up to sophisticated high-speed drag-chain systems. Do it all with ÖLFLEX® CONNECT. Systems Solutions made by LAPP.

INFOBOX
Expanding cable assembly, giving better advice to customers and standardising global activities - these are the ideas behind ÖLFLEX® CONNECT. To this end, LAPP is building up its engineering, production and assembly capacities in America, Europe and Asia.
We’re constantly putting our products to the test.
But never questioning our core values.
Along with committed and loyal employees, the greatest advantage a company has is the trust of its customers. Satisfied customers are the foundation of our company’s success. LAPP strives to be the ‘go-to’ design and supply partner for our customers in every corner of the world. A trustworthy, reliable partner. As trust is earned over time, it’s our primary focus. You can be assured that customer needs come first. Always.

QUALITY

Recipe for success – in-house production

Your demands are higher than ever. Our innovations satisfy even the strictest requirements because of our branded products – varied as they may be – always include two inherent components: expertise and innovation.

Our developments are produced by our own hands. We serve your needs directly from 18 production facilities across America, Europe, and Asia.

LABORATORY AND TEST CENTRE

Bend, but don’t break

Highly flexible cables have to withstand millions of bending cycles at different speeds and with extreme bending radii. And that’s not all, because they need to resist mechanical stresses and chemicals too. Our laboratory and test centre assures performance, by:

• Testing of tear resistance and tensile strength, resistance test, electrical test, fire tests
• Endurance testing of highly flexible cables under extreme stress
• Testing of cables in cable tracks of varying lengths with different bending radii and travel speeds

CERTIFICATIONS

For us, good is not good enough

Our products are used in virtually every industry. They are frequently found in the most sophisticated machines of their type. Machines that operate around the clock – where downtime is not an option. But it’s not just in major machinery where you need to be able to rely on the smallest of connections. It’s everywhere. As evidence of LAPP quality and reliability, our products carry the world’s strictest approvals.

Examples of global approvals:
Deeply ingrained

Our company works with many values: Measured values, building-stock values, colour values, balance-sheet values, estimated values, percentage values. However, our true values are those that have made us strong. They shape our business culture today and will continue to do so tomorrow. Ultimately, we want to be a measure of reliability for all employees, customers and business partners.

Customer-oriented

We find quick and simple solutions for our customers – at a competitive price-performance ratio. We hold our customers and partners in the highest regard and guarantee them worldwide security of supply through international production sites. This enables them to be successful in their markets.

Family-oriented

We work together toward our goal in a spirit of trust. Respect and appreciation are just as important to us as personal responsibility and transparency. We actively train and develop our staff.

Success-oriented

Our company is very versatile. It is our flexibility above all that secures profitable growth: our reaction to new challenges is quick and well-considered. Our processes are transparent, and we make sustainable, long-term-oriented decisions. We remain conscious of our risks while driving our growth. We also set standards for your benefit.

Innovative

We continuously develop our products, solutions and services. To ensure that there is no compromise when it comes to quality, we manufacture in our own plants. We pledge ourselves to ensure the well-being of our employees and the conservation of environmental resources.
Others merely speak of proximity to the markets.
We also speak of proximity to people.
proximity

We want you to be a satisfied customer. Not just with our branded products, but also with us as a company. We understand the markets, we seek out trends and we speak your language. That’s because we are there for you – wherever you may need us. We make this promise with our extensive global footprint: over 100 international outlets, 39 sales companies and 18 production sites with ultra-modern logistics facilities. One call is all it takes: we’ll be with you where you need us as quickly as possible. So you can keep in touch – and we can meet your business needs.

CONNECT

From person to person
The greatest value of any company is not found on the balance sheet. It’s people that matter most, not profits. No machine in this world can replace personal attention. That is precisely why LAPP’s goal is not only to be present in global markets and meet local requirements. Our connection to people – engineers, buyers, designers – is much greater as they make the market. Our employees work tirelessly, applying their skills and energy to develop new ways to meet your needs. It is only through our extensive, dedicated global team that we connect people, customers, partners all around the world.

OUR INNOVATIVE STRENGTH

The quality and innovative strength of our products don’t result from chance – more than 600 LAPP experts worldwide work on making our products even better.

49% Special cable & systems
32% Research & development
6% Test centre and laboratory
13% Product management

AT OUR SITES WE OFFER YOU...

At our sites we employ a total of 3,770 people delivering you the best support, the best products and the best advice for your solutions.

The following areas of expertise are covered:

- Product development
- Cable production
- System assemblies
- Laboratories and test centres
- Logistics and goods centres
- International expertise training centres

There are 8 strong brands

More than 40,000 standard products

Employees from 152 countries

3,770 employees
The future is very much connected with your origins. A glance back over the company’s history makes it clear where our strengths lie – strengths that have ultimately been responsible for the international success enjoyed by the LAPP Group. Headquartered in Stuttgart-Vaihingen in Germany, U.I. Lapp GmbH can look back on over 50 years of success within cable and connection technology. The site is both the founding location of the firm and the current company headquarters. Over the years, the small company in a garage grew into an international market leader operating in over 140 countries. It’s never been easier to get in touch with us. Contact us online, via the app, or order directly from the e-shop.

You can even connect your inventory management system to our SAP interface to ensure a flawless procurement process – it’s all part of the service.
