New product

EPIC[®] POWERLOCK BOX

The EPIC[®] POWERLOCK BOX combines 5 different coloured panel bases in one single unit. With this design, all contacts are already integrated so no extra contacts need to be ordered.

The EPIC[®] POWERLOCK BOX is available in both crimp or screw versions as well as a source or drain box. For added protection, a version with a sealed security lid is available as well.

The EPIC[®] POWERLOCK BOX is perfectly suited for mobile and stationary energy supply (e.g. mobile generators, central energy supply on venues or at the harbour side) as well as places where a secured energy supply is needed.

Benefits:

- Compact 19" rack mounting format
- Sealed security lid option
- Colour coded design ensures only the correct sequence of connecting (GN->BL->BN->BK->GY) and disconnecting (GY->BK->BN->BL->GN)
- Connection to a micro switch on the rear end of the box can be activated once all cable connectors are inserted for signal status
