### Information on Price Adjustment

Dear Valued Customers,

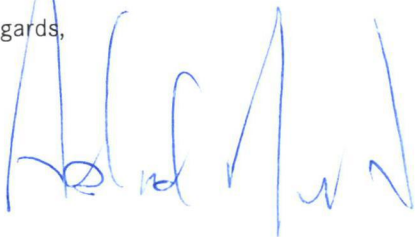

Over the past weeks, our shared economic environment has become significantly more challenging. Geopolitical events have led to substantial cost increases for raw materials, energy, transportation, and packaging. At the same time, ensuring the greatest possible stability and reliability of supply chains requires an increasing level of effort.

Thanks to our continuous improvement initiatives and our consistent focus on creating customer value, we have so far been able to absorb these effects on your behalf and to maintain high product availability as well as a high level of service. However, it is no longer sustainable to fully absorb these cost developments without compromising the high quality and reliability you expect from LAPP.

Therefore, **effective June 1, 2026, we will implement a market-oriented price adjustment with an average increase of 5%**. This adjustment applies across our entire portfolio, although product-specific deviations may occur, for example for infrastructure products or items containing precious metals. The new conditions will be available in the online shop as of the effective date.

Should you have any questions, our sales team will be happy to assist you, including in a personal meeting on site. We greatly value you and the trust you place in us and look forward to continuing our successful collaboration.

Kind regards,

Adrianus van de Noort

CSO EMEA
