APPLICATION SUCCESS STORY

Machinery and Automation Industry

A worldwide leader in automotive safety, a pioneer in both seat belts and airbags technology was looking a cable ideal for machinery application.

Application Description

They needed cable for their crash test simulators to collect data during impact. The cable connects to the vehicle's board controls and the facilities control room. It moves with the car so flexibility is a key feature for re-use.

Requirements

They had two major requirements, a composite cable able to carry all the connections needed to record the data and a cable flexible enough to move with the car through to impact.

Benefit

Our cables lasts more tests than the prior cable supplier giving them longer life with their test equipment. Our longer cables help them save lives.

Lapp Products

Special composite cable: 24/6 pair + RG 58 coax + 12/4c + 18/1c
