APPLICATION SUCCESS STORY

Machinery and Automation Industry

A manufacturer of Infrared Dryers and printing accessories for the printing industry; specializing in providing machines that dry the “ecologically friendly” water based inks used in the printing of media such as magazines.

Application Description

The needed higher density connector for some their machine applications that the ones they were currently using. Our MC Series having the ability to handle 5 modules in a size 16 as compared to 4 modules in the other product currently used was a clear improvement. We were able to give the customer 18 contacts of various current capacities in the space the competitive product only could put 14 in.

ÖLFLEX® 190 Cable

EPIC® MC Series Connectors

The EPIC® MC Modular Series connector can be custom to meet application requirements by combining a variety of standard plug-n-play modules within various size support frames. Configurations include contacts for power and control, thermocouple contacts, data modules for Profibus and Ethernet, and pneumatic modules.

SKINTOP® Strain Relief Cable Glands

SKINTOP offers a full line of durable, liquid tight, easy to assemble strain relief cable gland that is universally suited for all types of machinery & equipment. The heavy duty SKINTOP design provides great pullout strength. Superior integrated locking mechanism includes an internal ratchet for vibration proof protection. These cable glands are available in nylon or nickel plated brass for high impact applications.

ÖLFLEX® 190

ÖLFLEX® 190 multi-conductor cable has the highest oil, coolant and solvent resistant PVC jacket for control and power applications in an industrial environment. ÖLFLEX 190 is designed for use in all electrical equipment in dry, damp and wet conditions.
