ÖLFLEX® FOR MACHINERY

Whether it is washdowns or severe cutting oils, coolants or chemicals, ÖLFLEX® 190 will withstand the harshest industrial environment. ÖLFLEX® 190 cables are engineered and tested for high performance and durability allowing you to save money on down time and lost production. When you need a cable that can route and bend to conform to your machine without damage, Lapp ÖLFLEX® 190 is the cable you can trust!

- 20 years as the industry's leading control cable
- Fully tested for oil resistance passing UL Oil Res. I & II tests
- Durable, extremely flexible industrial design
- Built to withstand mechanical abuse passing UL crush impact tests
- Specially formulated jacket compound to withstand cracking, melting, softening or swelling
- Meet NFPA 79 2007 standards
- Many sizes available
