

FIFTY YEARS AS A MARKET LEADER IS
JUST THE BEGINNING OF **OUR STORY.**

ÖLFLEX® Tray II RELIABILITY ANYWHERE THE WIND TAKES YOU!

When you thought our cables couldn't get any better, they have!

Lapp's innovative new ÖLFLEX® TRAY II now enhanced oil and temperature resistance and they are expertly designed to withstand the demanding requirements of the wind industry.

When you need a cable that can offer an even greater level of performance and longevity resulting in higher value and cost savings, Lapp ÖLFLEX® TRAY II is the cable you can trust.

- Unrivalled flexibility down to -25°C
- Resists oil, humidity, and emissions
- UL WTTC 1000V, FT4 to meet NEC code
- Durable all season performance
- Fully tested for oil resistance passing UL Oil Res. I & II and to withstand gear box oil
- Torsion tested for the wind turbine industry

Lapp Group also offers a full line of industrial connectors, glands, conduits, cable marking systems and accessories:
