

CHARGING CABLE

MODE 3, 32A 1-phase, 7m

FOR CHARGING ELECTRIC AND HYBRID CARS

>> THE CHARGING CABLE FROM LAPP with 7m extension length allows easy and fast charging at public charging stations and wall boxes. Vehicles can be charged with a single-phase 32A supply, a much faster process than with a standard 16A charging cable. Thanks to the standardised Type 2 connector, this is possible throughout Europe. The robust design and the silver-plated corrosion resistant contacts ensure optimum power transmission and give the charging cable a long service life.

ADVANTAGES AT A GLANCE

- Charges twice as quickly as the 16A 1-phase standard charging cable
- Ergonomic solid rubberised connector/coupling design
- Silver-plated contacts for optimum power transmission and longevity
- Complies with all relevant VDE and IEC product requirements
- Robust design

INCLUDED IN DELIVERY
