General questions

QUESTION	ANSWER
Do you already work with OCI?	
Do you use SAP as an ERP-system?	
Dou you use an additional software for OCI? If yes, which one?	

After implementing the interface you get two buttons at the order summary to either only transfer the data to your ERP-system or to transfer the data to your system and process an order via the e-Shop at the same time.

Quantity units: Usually we transfer the SAP-units as shown below. If you wish to having transferred different units, so write them down in the row "differing unit".

DESCRIPTION	UNIT	DIFFERING UNIT
meter	M	
piece	ST	
pack	PAK	
roll	ROL	

Price: We transfer the all-round price inclusive discounts and surcharges without the value added tax. If you wish anything else, please let us know.
