

29500089	DATA SHEET
Valid from: 16.09.2019	POF MEASURING EQUIPMENT SET 660/850NM

Description

- Optical fiber POF measurement equipment set in plastic case
- Included basic devices (optical transmitter and optical power meter) for attenuation measurement on polymer optical fibre
- Changeable adapters for optical transmitter and optical power meter available (separately cultivable)

General characteristics

Optical connection (optical transmitter)
Optical connection (optical power meter)
Power supply (all devices)

Changeable adapters, provided with BNC
Changeable adapters, provided with M12-thread
Battery 9V
alternative: external DC connection

Content of packaging case

Article	Description
-	PLASTIC CASE BLACK 385 x 315 x 85mm [LxBxH]
29500070	POF OPTICAL TRANSMITTER (TMR)
29500080	POF OPTICAL POWER METER 660/850 NM

Application range

Laboratory tests, optical installation and quality control, testing of optical transmitters & attenuation measurement on optical fibres
