

## FLEXIMARK® WRAPPING LABEL TCK

### General description:

- Print your own label marking when you need it
- Print area with laminated transparent foil for protection
- Wrapping label marking for pipes and cables
- Used for industrial, electrical and telecom installations in indoor environment
- Delivered on a roll for thermal transfer printing
- Different sizes for different cable diameters
- UV-resistance

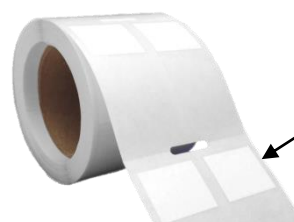

### Technical data:

- Material: Polyester
- Adhesive: Permanent acrylic
- Core: 38mm (standard)
- Temperature range: -40°C to 125°C
- Applying temperature: min 10°C

**Delivery:**

Wrapping label is delivered on a roll for printing on a thermal transfer printer.

**Mounting:**

FLEXIMARK® Wrapping label TCK is mounted directly on the cable, by wrapping the label around the cable with printing area first. At the end the transparent foil will cover the printing and protect the print against different strains.

**Other product data:**

ETIM Classification: EC001288 Labelling material  
 Import code number for foreign trade (taric cod): 39269097  
 Country of origin: SE

**Advantages:**

- Print your own durable marking when you need it
- No cable ties are necessary for mounting
- Durable marking with a laminated protection over the text
- Halogen free material with UV-resistance
- Text with long term durability thanks to thermal transfer printing
- Thermal transfer printing method increases smudge, scratch resistance and resistance to oils and chemicals.
- Only two labels in one row makes the printing process more cost-efficient

**Related products:**

- FLEXIMARK® Wrapping label TCK is printed with CAB thermal transfer printers (available in our assortment)
- To make the printing process more efficient, the usage of FLEXIMARK® Software, label software for printing marking systems, is recommended
