valid from: 09.09.2021	ÖLFLEX® 127 HSLH	

Application

ÖLFLEX® 127 HSLH are halogen free, flame retardant control cables for occasional flexible use and fixed installation for medium mechanical use. They are also suitable for use in dry or damp areas, but not outdoors.

They are suitable for occasional, non-automated movements. The maximum tensile load is 15 N/mm² of conductor cross-section during installation and operation. Compulsory guidance is not permitted.

ÖLFLEX® 127 HSLH cables are particularly used in areas, where human and animal life as well as valuable property are exposed to high risk of fire hazards. In the event of a fire minimal toxic and no corrosive gases occur.

Application range: Public buildings, airports, railway stations, plant engineering and construction, air conditioning systems, stage applications
