valid from: 01.01.2019	ÖLFLEX® 408 P	

Application

ÖLFLEX® 408 P cables are VDE approved power and control cables for occasional flexible use and fixed installation subject to normal load conditions. They are also suitable for use in dry, damp or wet areas. They are suitable for outdoor use if the indicated temperature range is observed. ÖLFLEX® 408 P cables are increased oil resistant and at room temperature largely resistant to acids and caustic solutions. The outer sheath withstands high mechanical stresses, in particular abrasion and dragging. It is also cut proof and resists microbes and hydrolysis. They are suitable for occasional, non-automated move-ments. The maximum tensile load is 15 N/mm² of conductor cross-section during installation and operation. Compulsory guidance is not permitted.

Application range:

As power and connecting cable for control systems in machine tools, plant engineering and construction, industrial machinery, conveyor systems, production and assembly lines as well as in measuring and control technology and data processing systems.
