

DATA SHEET	1233304
UNITRONIC® SPEAKER LIHH BK	Valid from: 22.10.2008

Usage

Halogen free, unscreened Lautsprecherkabel, speaker cable, usable in studio, on stage or for premium phone- and car HiFi-Systems, especially where halogen free cables are needed, e.g. public facility.

Technical data

Core	fine strands of plain copper wires (IEC 60228, Class 5)
Core insulation	halogen free special compound
Colour code	red, black
Outer sheath	halogen free special compound, black like RAL 9005
Nominal voltage	48 V
Test voltage	1500 V AC
Temperature range	flex. use -5 bis +70° C max. core temperature fixed inst. -30 bis +80° C max. core temperature
Minimum bending radius	15 x cable diameter for flex. use 5 x cable diameter for fixed installation
Flame retardance	according IEC 60 332.1 / VDE 0482 Part 265-2-1

EC directive:

This cable is for use in the voltage range of < 50 V AC that is < 75 V DC and is therefore not in accordance with the ECD 73/23/EEC (low voltage directive)
